Education

K.R. Mangalam University, Gurugram, Haryana — *Haryana, India*

Bachelor of Technology Computer Science & Engineering (Cyber Security) — *August 2023 – June 2027*

• CGPA: 7.2/10

Work Experience

Mynerva

FULL-STACK DEVELOPER — *Remote*

- Collaborated with the development team to create responsive and user-friendly web applications, focusing on component-based design.
- Leveraged technologies such as Tailwind CSS, TypeScript, Next.js, and responsive design principles.
- Utilized Git/Github to manage and track changes to the codebase, enabling efficient collaboration with team members and reviewing pull request.
- Improved overall application performance by 30% and reduced code rewrite by 70%.

Dwarkadheesh Polytechnic — *Haryana, India*

Web Developer Intern | June 2026 – August

- Developed and deployed responsive, production-ready web interfaces using HTML, CSS, JavaScript, and modern frontend technologies, ensuring cross-browser and mobile responsiveness, for improved performance and user experience.
- Built and enhanced responsive web features with interactive UI components, API integration, form validation, and performance optimization

Projects

CDN Lab — Content Delivery Network Simulator

React, TypeScript, Node.js, Express.js, Redis

- Building a full-stack simulator to visualize geographic request routing, origin servers, and regional edge-node caching.
- Designing cache mechanisms with TTL expiration, LRU eviction, and cache invalidation to model content delivery behavior.
- Developing a dashboard to compare cache hits, misses, and simulated request latency.

VRINDA – Automated Vulnerability Scanner

Python, Nmap, Docker

- Developed a tool to scan networks for security vulnerabilities using Python and Nmap.
- Containerized the application using Docker for reproducible deployments.
- Automated vulnerability detection and generated structured scan reports.
- Applied security testing methodologies inspired by Burp Suite workflows.

Portfolio Website HTML | CSS | JavaScript | Vercel

- Built and deployed a responsive portfolio using React/Vite (or HTML/CSS/JS if that's the current version), optimized for performance and mobile devices.
- Optimized loading performance and mobile responsiveness.
- Deployed using Vercel with responsive layouts across multiple devices.

Skills

- **Languages**: C++, Java, MySQL, TypeScript, JavaScript, Python, HTML5, CSS, Tailwind CSS.
- **Technologies / Framework** Prismic, Django, Pandas, Slice Machine,Spring Boot (Learning),ReactJS, FastAPI, Next.js, Node.js, Express.js, MongoDB, Git/GitHub, Mon Postman, Chart.js, Bootstrap, Material UI, Canva, Figma.
- **Academic Coursework**: DSA, OOPS, DBMS, Operating System, Computer Networks.
- **Soft Skills**: Communication, Leadership/ Management, Persistence, Teamwork. 1

Achievements

- Achieved a 100+ day coding streak on LeetCode, demonstrating consistency and commitment to problem-solving.
- Build and deployed multiple projects using modern web development technologies and software engineering practicesParticipated in DEAS 4.0 Tech Ideathon at K.R. Mangalam University, demonstrating innovation, analytical problem-solving, technical proficiency, and collaborative teamwork to develop technology-driven solutions.
- Earned the Leetcode 100 Days badge 2025 through consistent coding activity and perform engagement.[Ranklist]

Extracurricular Activity

K.R Mangalam University

Afterdark (Media and Photography Society) — *October 2025 - January 2026*

COORDINATOR — *K.R. Mangalam University*

•Reformed the society by implementing an emphasis on teamwork and systematic work.

• Proposed and executed marketing and network activities to raise awareness.

Google Gemini Campus Ambassador Intern | May 2026 – Present COORDINATOR
